

Package List for All Scripts

Michael

Table of contents

1	Packages Used in All Phases	2
1.1	Python	2
1.1.1	Phase 1 Parsing	2
1.1.2	Phase 2 Spatial Polygons and True Acreage	2
1.1.3	Phase 3 Economic Merge and MICE Imputation	2
1.1.4	Phase 4 Econometric Modeling	2
1.1.5	Phase 5 Hawaii Micro-Case Study	2
1.1.6	Phase 6 Visualization	2
1.2	Julia	2
1.2.1	Phase 1 Parsing	2
1.2.2	Phase 2 Spatial Polygons and True Acreage	3
1.2.3	Phase 3 Economic Merge and MICE Imputation	3
1.2.4	Phase 4 Econometric Modeling	3
1.2.5	Phase 5 Hawaii Micro-Case Study	3
1.2.6	Phase 6 Visualization	3
1.3	R	3
1.3.1	Phase 1 Parsing	3
1.3.2	Phase 2 Spatial Polygons and True Acreage	3
1.3.3	Phase 3 Economic Merge and MICE Imputation	3
1.3.4	Phase 4 Econometric Modeling	4
1.3.5	Phase 5 Hawaii Micro-Case Study	4
1.3.6	Phase 6 Visualization	4

1 Packages Used in All Phases

1.1 Python

1.1.1 Phase 1 Parsing

- pathlib (standard library), pandas, geopandas, shapely.wkb (shapely)

1.1.2 Phase 2 Spatial Polygons and True Acreage

- time (standard library), pathlib (standard library), pandas, geopandas, osmium, shapely.wkb (shapely)

1.1.3 Phase 3 Economic Merge and MICE Imputation

- multiprocessing (standard library), pathlib (standard library), micforest, pandas, numpy

1.1.4 Phase 4 Econometric Modeling

- pathlib (standard library), pickle (standard library), numpy, pandas, scipy.stats, statsmodels.formula.api

1.1.5 Phase 5 Hawaii Micro-Case Study

- pathlib (standard library), re (standard library), numpy, pandas, geopandas, pygris

1.1.6 Phase 6 Visualization

- sys (standard library), pathlib (standard library), re (standard library), warnings (standard library), numpy, pandas, matplotlib, geopandas, pygris, seaborn, scipy

1.2 Julia

1.2.1 Phase 1 Parsing

- CSV, DataFrames, GeoDataFrames, ArchGDAL, Statistics, LibGEOS

1.2.2 Phase 2 Spatial Polygons and True Acreage

- CSV, DataFrames, GeoDataFrames, ArchGDAL, Statistics

1.2.3 Phase 3 Economic Merge and MICE Imputation

- CategoricalArrays, CSV, DataFrames, Mice, Printf, Random, Statistics

1.2.4 Phase 4 Econometric Modeling

- DataFrames, CSV, GLM, CovarianceMatrices, Serialization, Statistics, LinearAlgebra, Printf, Distributions

1.2.5 Phase 5 Hawaii Micro-Case Study

- GeoDataFrames, ArchGDAL, DataFrames, CSV, Statistics, Printf

1.2.6 Phase 6 Visualization

- Downloads (standard library), CSV, DataFrames, GeoDataFrames, ArchGDAL, Cairo-Makie, GeoInterfaceMakie, Statistics, StatsBase, Printf, ZipFile

1.3 R

1.3.1 Phase 1 Parsing

- wooldridge, tidyverse, sf, tigris, future, furrr, parallelly, this.path

1.3.2 Phase 2 Spatial Polygons and True Acreage

- wooldridge, tidyverse, sf, tigris, future, furrr, parallelly, this.path

1.3.3 Phase 3 Economic Merge and MICE Imputation

- wooldridge, tidyverse, mice, ggmmice, future, furrr, parallelly, this.path, VIM, patchwork

1.3.4 Phase 4 Econometric Modeling

- `wooldridge`, `tidyverse`, `lmtest`, `sandwich`, `broom`, `this.path`

1.3.5 Phase 5 Hawaii Micro-Case Study

- `sf`, `tidyverse`, `tigris`, `future`, `furrr`, `parallelly`, `this.path`

1.3.6 Phase 6 Visualization

- `tidyverse`, `sf`, `scales`, `ggspatial`, `ggdist`, `tigris`, `biscale`, `cowplot`, `knitr`, `kableExtra`, `this.path`
